Opinion	1
Analysis	2
I. Assumed facts.....	2
(a) Basis of the assumed facts in the following subsections	2
(b) Ms Sample and her prospects before the accident.....	2
(c) Effects of the accident on her work and earnings.....	3
(d) Effects of the accident on her domestic capacity	3
II. Estimation	4
(a) Basis of the estimates.....	4
(b) Future earning capacity — expected, residual, and lost	4
(c) Earnings multiplier and present-value factors [Appendix A, Schedule 2]	5
(d) An average BC woman’s expected earning capacity [Schedule 1].....	6
(e) Domestic capacity.....	6
(f) Domestic-capacity multipliers [Appendix A, Schedule 3]	6
(g) Evaluating other loss assumptions.....	7
III. Expertise and professional qualifications	7
IV. Notes	8
Tables	
A. Summary of estimates.....	1
B. Expected annual earnings.....	2
C. Summary of annual expected and residual earnings and annual losses.....	3
D. Expected, residual, and lost future employment capacity.....	5
E. Domestic capacity — loss & multipliers, life expectancy	6
F. Using the multiplier schedules to evaluate future earning-capacity assumptions — arbitrary examples.....	7
N-1. Entry-level occupations — average annual earnings of BC female	9
Appendices	
A. Contingency & present-value factors	
B. Documents employed	
Schedule	
1. Earning capacity — Average BC female without high-school graduation	
2. Earnings multipliers and present-value weights	
3. Future domestic capacity— multipliers and present-value weights	

[In this example, Appendix A appears in a link to the section “Contingency & present-value factors,” and Appendix B and the schedules are omitted.]
